BBH Capital Partners

BBH Capital Partners (BBHCP) provides highly customized capital solutions to lower middle-market companies. Our flexible investment mandate gives us the ability to act as a control or non-control investor and to structure our investments as a combination of equity and subordinated debt securities as needed. We are currently investing through our sixth fund, which has committed capital of \$1.215 billion.

Investment Focus

- Investment size: \$40 million to \$150 million (substantially larger investments with co-investments and limited partners)
- Enterprise value: Up to \$750 million
- Industry focus: healthcare; technology, media and telecommunications; business products and services

Deal Types

BBHCP provides capital to facilitate the following deal types:

- Management or leveraged buyouts
- Growth equity
- Minority or majority recapitalizations (including dividend recaps)
- Ownership transitions and generational transfers
- Buy-and-build strategies
- Acquisitions or industry consolidations

Transaction Types

Control Transactions

BBHCP is the majority owner of a business.

- Typical structures include an equity capital solution with the flexibility to also provide a subordinated debt investment by BBHCP.

Minority/Non-Control Transactions

BBHCP can act as the lone institutional investor with a minority stake in an owner-operated business or as a significant minority investor in a business partnering with other like-minded institutional investors seeking to bring on a later stage financial partner to provide growth capital or liquidity to existing stockholders or a combination of the two.

- BBHCP works with a family-owned or owner-managed business that is looking for a capital partner but is not willing to sell a controlling stake. Our capital is typically deployed when a business is acquiring another business, investing in a strategic growth initiative, solving family liquidity issues, facilitating generational ownership transitions or a combination of these events.
- BBHCP provides capital to a venture capital-backed business that is looking for a later stage partner. A typical investment includes primary growth capital, liquidity for any shareholders that are looking for an exit at a market-based valuation or frequently a combination of primary and secondary capital.

Benefits of BBHCP as a Partner

The BBH Advantage

BBHCP utilizes the extensive global network of BBH to provide its portfolio companies with a wide array of benefits, including access to new customer/vendor relationships, introductions to potential acquisition targets and assistance with implementing improved information systems.

Flexible Mandate

The flexibility of our investment mandate is a key differentiator for management teams and co-investors. We evaluate both control and non-control transactions and can invest in a range of securities, including equity, subordinated debt or some combination of the two. Unlike many other funds, there is no set formula for the equity/debt split, which gives us the ability to customize a capital structure that we believe is appropriate for each investment.

Selected Portfolio Companies
