Capital Preservation

The Strategy seeks to provide maximum total returns, consistent with preservation of capital and prudent investment management. We aim to identify credit opportunities across a broad range of fixed income sectors. The Strategy's investments are primarily short-term and investment-grade.

Durable Credits

We seek credits able to withstand severe stress scenarios without permanent impairment of principal or interest. Our research focuses on an issuer's durability, transparency, management, and structure.

Unique Valuation Focus

Our unique valuation framework attempts to ensure adequate levels of current income potential for each investment. We aim to preserve capital against credit losses, promote discipline, limit biases toward pursuing high yields, and focus our analysts' research efforts.

Performance (As of 09/30/2025)

Net of fees return reflects the deduction of the maximum investment advisory fee.
Past performance does not guarantee future results.

Credit Quality (As of 09/30/2025)

	Rep Account	Benchmark Index
Cash and Cash Equivalents	11.8%	0.0%
U.S. Treasuries	0.2%	100.0%
AAA	22.5%	0.0%
AA	13.4%	0.0%
A	27.2%	0.0%
BBB	19.9%	0.0%
BB	2.7%	0.0%
B or Lower	1.7%	0.0%
Not Rated	0.6%	0.0%

Portfolio holdings and characteristics are of the Representative Account and are subject to change. Totals may not sum due to rounding.

Duration Distribution (As of 09/30/2025)

	Rep Account	Benchmark Index
< 1 Yr	55.7%	0.9%
1 - 3 Yrs.	37.2%	99.1%
3 - 5 Yrs.	6.7%	0.0%
5 - 7 Yrs.	0.5%	0.0%
7 - 10 Yrs.	0.0%	0.0%
10 - 20 Yrs.	0.0%	0.0%
20+ Yrs.	0.0%	0.0%

Credit Quality letter ratings are provided by Standard and Poor's, Moody's, and Fitch and are presented as the higher of the three ratings. When a security is not rated by Standard & Poor's, Moody's, or Fitch, the highest credit ratings from DBRS and Kroll may be used. Absent a rating from these agencies, we may display Private Credit ratings, if permitted by the issuer, which could include ratings from Egan-Jones Ratings Co. Credit ratings reflect the credit quality of the underlying issues in the portfolio and not the portfolio itself. Credit rating exposure and composition are subject to change.

Issues with credit ratings of BBB or better are considered to be investment grade, with adequate capacity to meet financial commitments. Issues with credit ratings below BBB are considered speculative in nature and are vulnerable to the possibility of issuer failure or business interruption.

Duration is a measure of the portfolio's return sensitivity to changes in interest rates.

Yield to Maturity is the rate of return the portfolio would achieve if all purchased bonds and derivatives were held to maturity, assuming all coupon and principal payments are received as scheduled and reinvested at the same yield to maturity. This figure is subject to change and is not meant to represent the yield earned by any particular security. Yield to Maturity is before fees and expenses.

Credits: obligations such as bonds, notes, loans, leases, and other forms of indebtedness, except for Cash and Cash Equivalents, issued by obligors other than the U.S. Government and its agencies, totaled at the level of the ultimate obligor or guarantor of the Obligation.

The Representative Account is managed with the same investment objectives and employs substantially the same investment philosophy and processes as the Strategy. Each investor's portfolio is individually managed and may vary from the information shown. The representative account may change from time to time.

The Bloomberg U.S. 1-3 Year Treasury Bond Index is an unmanaged index of fixed rate obligations of the U.S. Treasury with maturities ranging from 1-3 years.

The composition of the index is materially different than the Strategy's holdings. An index is not available for direct investment.

Gross of fee performance results for this composite do not reflect the deduction of investment advisory fees. Net of fees performance results reflect the deduction of the maximum investment advisory fees. Returns include all dividends and interest, other income, realized and unrealized gain, are net of all brokerage commissions and execution costs. Performance calculated in U.S. dollars.

"Bloomberg" and the Bloomberg Indexes are service marks of Bloomberg Finance L.P. and its affiliates, including Bloomberg Index Services Limited ("BISL"), the administrator of the index (collectively, "Bloomberg") and have been licensed for use for certain purposes by Brown Brothers Harriman & Co (BBH). Bloomberg does not guarantee the timeliness, accurateness, or completeness of any data or information relating to the fund.

Risks

Investors should be able to withstand short-term fluctuations in the fixed income markets in return for potentially higher returns over the long term. The value of portfolios changes every day and can be affected by changes in interest rates, general market conditions, and other political, social, and economic developments.

Bond prices may be sensitive to changes in interest rates and a rise in interest rates can cause a decline in their prices. Investing in the bond market is subject to certain risks including market, interest-rate, issuer, maturity, call, credit, and inflation risk; investments may be worth more or less than the original cost when redeemed.

Asset-Backed Securities ("ABS") are subject to risks due to defaults by the borrowers; failure of the issuer or servicer to perform; the variability in cash flows due to amortization or acceleration features; changes in interest rates which may influence the prepayments of the underlying securities; misrepresentation of asset quality, value or inadequate controls over disbursements and receipts; and the security being structured in ways that give certain investors less credit risk protection than others.

The Strategy invests in derivative investments, investments whose values depend on the performance of the underlying security, assets, interest rate, index, or currency and entail potentially higher volatility and risk of loss compared to traditional stock or bond investments.

Foreign investing involves special risks including currency risk, increased volatility, political risks, and differences in auditing and other financial standards.

There can be no assurance the Strategy will achieve its investment objectives.

Brown Brothers Harriman Investment Management ("IM"), a division of Brown Brothers Harriman & Co ("BBH"), claims compliance with the Global Investment Performance Standards (GIPS®). The objective of our Limited Duration Fixed Income Strategy is to deliver excellent returns in excess of industry benchmarks through market cycles. The Composite includes all fully discretionary fee-paying accounts with an initial investment equal to or greater than \$10 million with a duration of approximately 1.5 years. Accounts that subsequently fall below \$9.25 million are excluded from the Composite.
