**BROWN BROTHERS HARRIMAN ANNOUNCES LAUNCH OF
BBH GLOBAL CORE SELECT FUND**

New York, NY – March 28, 2013 – Brown Brothers Harriman & Co. (“BBH”) announced today that it has launched the BBH Global Core Select Fund (the “Fund”) (tickers: BBGNX and BBGRX), a no-load mutual fund. The Fund will be co-managed by Regina Lombardi and Tim Hartch, two members of the BBH Core Select investment team. The Fund is the successor to the BBH private investment partnership, BBH Global Funds, LLC – Global Core Select, which launched on April 2, 2012.

BBH Global Core Select’s strategy is to invest in established, cash generative businesses that are leading providers of essential products and services with strong management teams and loyal customers, and are priced at a discount to estimated intrinsic value. The Fund will generally hold 30 to 40 companies with market capitalizations greater than \$3 billion and which are headquartered in either developed countries, including the U.S., or developing countries with well established and liquid capital markets. At least 40 percent of the portfolio’s net assets will typically be invested in non-U.S. stocks.

“BBH Global Core Select fund is a natural extension of our disciplined approach to equity investing that we have carried out for more than a decade” said Tim Hartch, Co-Portfolio Manager of the Fund and the Partner in charge of BBH’s Equity Investment business. “While our investment team has researched, followed, and even owned non-U.S. companies for years, a global fund will provide greater flexibility for us to invest worldwide in shares of companies that meet our criteria.”

Risks

Investors in the Fund should be able to withstand short-term fluctuations in the equity markets in return for potentially higher returns over the long term. The value of portfolios change every day and can be affected by changes in interest rates, general market conditions and other political, social and economic developments, as well as specific matters relating to the issuers and companies in whose securities the portfolios invest. The Fund is classified as 'non-diversified' and may assume large positions in a small number of issuers which can increase the potential for greater price fluctuation. International investing involves special risks including currency risk, increased volatility, political risks, and differences in auditing and other financial standards.
